Publication date: 2000-01-03

January 03, 2000, Tonawanda, NY (USA) - Ziphany, LLC, announces the launch of their Online Energy Metering product. Ziphany has developed a device and software application to permit companies to obtain data from their electric utility meter over the internet. This device will eliminate the need to wait until the end of the billing cycle to determine your electric usage.

Ziphany, LLC is located in North Tonawanda, New York on River Road, and is currently offering services from this location. Following months of development and testing, Ziphany is starting to service customers in the Western New York region.

Al Bluemle, Managing Partner of Ziphany, commented, "This technology could revolutionize how data is collected and transmitted to the customer or the utility. Being able to react to an event the day it occurs rather than 24 hours or a month later, can change the way businesses is being done."

Ziphany, LLC is privately held by three partners, Al Bluemle, Brian Palka and Vince LaFratta. Collectively, the three bring experience from utilities, consulting, computer programming and manufacturing.
