February 2003, North Tonawanda, NY (USA) – Ziphany, LLC, a provider of Energy monitoring/verifications systems, announces the completion of a multi-stage upgrade to their existing website and reporting features. In response to user feedback, Ziphany has released a new look for their Now-Time™ data presentation. This new format includes several enhancements, more intuitive user screens, faster and more efficient data presentation, improved and more flexible reporting functionality, and paves the way for future features/improvements to help customers reduce energy costs.

Vince LaFratta, CTO of Ziphany, stated, “This new approach was very much driven by the requests of our users. We collected customer feedback and incorporated this directly into our development process. The end result is a much more user-friendly product.”

Ziphany continues to lead the industry in meeting and exceeding customer requests. Most recently, Ziphany has upgraded their hardware to accommodate wireless transmission of data.
