March 21, 2003, Buffalo, NY (USA) - Ziphany, LLC, a provider of Energy monitoring/verification systems and open-ended communication platforms, is nominated as one of the five finalists in for InfoTech Niagara's Best Emerging IT Company in Buffalo.

InfoTech Niagara, an organization formed to support and foster information technology companies in the Buffalo Niagara region, nominated Ziphany for this award in conjunction with their third annual "BETA Project" celebrating the latest triumphs of the WNY IT industry. The winning company will be announced on April 10, 2003 at the BETA awards banquet in downtown Buffalo, New York.

Tim Mattulke VP Business Development Ziphany, commented, "On behalf of Ziphany, I can say we are all very honored by this nomination. I have reviewed the other finalists in our category and have been very impressed. Any one of the companies in this category would be an excellent choice as the 'Best Emerging Company'. More importantly, I am very pleased to see the continuing trend of newly formed IT companies in this region; a collective effort on behalf of the new and the existing technology companies will create jobs and keep our young people from leaving this great part of the New York State."

Ziphany provides an open-ended communications platform that permits data acquisition from multiple hardware devices and existing building management systems. These data are then transferred to Ziphany's secure website where presentation applications can be utilized to view information to help reduce operational costs.
