

## ENERGY ANALYSIS

Ziphany's Energy Analysis Application provides Utilities, Energy Service Providers, Curtailment and Demand Response Providers and Energy users with a user-friendly web-based access to their Energy data.

Ziphany's Data Collection and Integration Application is utilized to collect customer energy data. Once captured, the data is validated and estimated, if needed.

The user can display logged data and real-time data on any workstation through a standard web browser .

Utilizing the graphing and reporting engines, the system will create usage profiles which will help you to better understand your load and how to avoid demand peaks.

In conjunction with the Ziphany Alarming and Notification Application, users can be notified when specific energy thresholds are passed.

### Features

- Graphical and tabular data
- Aggregation
- Virtual Meters
- Reporting

### Data Collection

- Electric, Gas, Water, Steam
- Ethernet, Dial-up, Wireless
- MV-90
- FTP / Data Files
- Custom data streams

### Managed and Maintained

- No Software to purchase
- 24x7 Website
- Automatic upgrades and software enhancements
- Knowledgeable and friendly technical support
